A
Simulation: step 1 (null probe)
task-decoding inflation (pp)
null probe above chance (pp)
B
Simulation: step 2 (rest-to-task)
task-decoding inflation (pp)
rest → task above chance (pp)
C
Real data: six decoders
Shin, no filter
Shin, causal
Tufts, 3-class
Tufts, 0 vs 2
rest → task above chance (pp)
task decoding above chance (pp)
carryover
drift
